

IDW 2005 CD ROM Contents

Richard Kayser, NIST

“Overview of New NIST Advanced Metrology Laboratory”

Roxanne Robinson, A2LA

“Legal Issues with Accreditation”

Bill Rippey, NIST

“AIAG Demonstrates Metrology Interoperability: To Save You Time & Money”

Charles Wang, Optodyne

“3D Volumetric Positioning Errors of CNC Machining Center Theoretical Derivations and Laser Vector Measurements”

Eric Stanfield, NIST

“Roundness Standard Calibration at NIST: A Comparison of the New Versus the Old Method”

Jim Salsbury, Mitutoyo America

“Recent Progress on Standards for Testing Video Based CMM's”

Steve Toothaker, Naval Surface Warfare Center

“The Art of Interferometric Flatness Measurement – What Methods are Best for Your Laboratory?”

Michael Metzger, Nikon Instruments

“Development of a New Confocal Measuring Head for Coordinate Measurement of 3 Dimensional Features of Modern Semiconductor Packages.”

Ed Morse, UNC @ Charlotte

“Multisensor Metrology Platforms”

Henrik Nielsen, HN Metrology Consulting

“Taking Dimensional Metrology to the Next Level”

Jim Clark, Metris

“The Cross Scanner, A Paradigm for 3D Feature Measurements”

Arnold Free, Maya Metrix

“Multiple Coordinate System and Direct-to-Cad Based Process for Setting Skewed Assembly Jig Details”

Steve Phillips, NIST

“Measurement Uncertainty, CMM's & Standards: Today and the Future”

Ted Doiron, NIST

“A New Standard Reference Gridplate from NIST”
