

Take the guesswork out of your quality control program with *SQCpack*. It's an easy and scalable statistical process control solution that includes all the tools you need to comply with critical quality standards, reduce variability, improve profitability, and reduce costs.

SQCpack is easy to use. From the operator entering data on the shop floor to senior management reviewing process performance, *SQCpack* is the SPC application everyone on your team can use.

Data analysis tools

Performance charting has never been easier. A chart wizard walks you through the chart creation process. Once created, you can modify and customize your chart to fit your needs using live-editing capabilities right on the chart.

Now you can get to the discovery phase of your data faster to find out what your data reveals about your processes.

Get to the discovery phase of your processes faster and reveal what your data is telling you: Analyze mass amounts of data easily, utilizing the software's charting tools. Vivid and appealing charts help to cut through the noise to get to the information that you need.

Prioritize your attention: Our unique StatBoard® can analyze numerous processes at once and prioritize them for further investigation, saving time and focusing your attention where it's needed most.

Stay in control of your processes: Monitoring your processes has never been easier. You can employ a variety of options to quickly see and identify trouble before it arises. *SQCpack* lets you choose AIAG, Wheeler, AT&T, Shewhart, or Juran out-of-control tests, or define your own.

Get feedback in real-time or anytime: You can perform offline analysis or monitor processes in real-time, so you get the feedback you need, when and how you need it.

Quality
control for
anyone,
anytime!

Produce “better than spec” results by ensuring processes are on target with capability analysis: *SQCpack* allows you to review and further optimize your processes through automatic capability analysis calculations, such as Cpk and Ppk, among others.

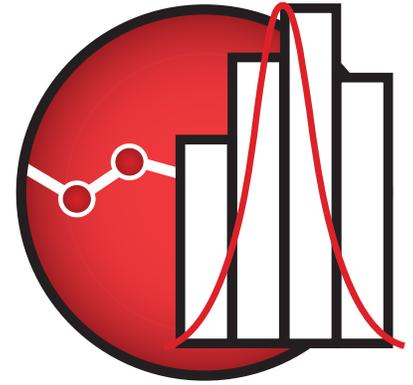

Stay on top of potential issues with alerts: Set up alerts so you can get immediate feedback and catch issues before they become a problem. Only want to receive alerts once an hour? Concerned about a specific process? Alert settings in *SQCpack* can be set to fit your workflow and needs.

Share information easily: You can share information with others across the plant or around the globe, quickly and easily with *SQCpack*'s customizable charts and reports. Add charts to presentations to create a more powerful and visually appealing message that makes your data easier to understand.

Backed by experience

Since 1984, PQ Systems has been providing customers with products and services to help them implement quality improvement programs and demonstrate proof of their quality performance.

Data collection tools

Regular prompts will remind your busy operators to enter data on schedule as they go about their work.

Whether your operators are manually entering data into *SQCpack*, or data comes directly from a measurement device, or a combination of both, *SQCpack* makes quality data collection easy.

SQCpack integrates with your existing systems, connecting to handheld devices and CMM equipment, and accessing data from a variety of software sources.

Data quality and security

Have peace of mind knowing that your valuable data is secure. User security, rights, roles, and divisions ensure only authorized personnel can work with various levels of the program. Auditing functions allow you to review the history of changes to your data in order to maintain complete control.

SQCpack is easily scalable. Whether it's for use on a single line or a global implementation across all your plants, *SQCpack* can easily handle it.

Organizations world-wide have selected *SQCpack* because of its easy deployment, implementation, and operation.
